PROFILE

Software developer with experience in Full Stack Development. Systems Engineering student with intermediate English Skills. Committed to delivering high quality solutions and constantly improving skills and knowledge.

LABORAL
EXPERIENCE

C&A Technology
Developer | 2023 – 2023

Designed and developed the company's main webpage, enhancing both the user interface and user experience. Implemented optimization techniques to improve website load time and overall performance. Additionally, I performed regular maintenance and updates to ensure the optimal functioning of the website. The positive feedback received from employers and users reflects the success of delivering a user-friendly and high-performance website.

Freelancer
Freelance Developer | 2023 – ACTUALIDAD

As a freelance full-stack developer, I specialized in creating dynamic and efficient web solutions. I designed and developed robust APIs and endpoints to facilitate seamless communication between front-end and back-end systems. Employing optimization strategies, I significantly improved the overall performance and responsiveness of the applications I worked on. Through regular maintenance and updates, I ensured the continued optimal functioning of the systems. Positive feedback from clients attests to my commitment to delivering user-friendly, high-performance solutions.

PERSONAL
PROYECTS

**Shortly
2023**

Designed and developed Web application for shortening URLs. It provides an administration panel, authentication, visit tracking, and a responsive design for an optimal experience on various devices.

**Ticket System
2024**

Designed a robust system for managing tickets, users, and roles. It offers an administration panel, user authentication, ticket assignment functionalities, real-time chat to enhance communication and problem resolution, and a responsive design for seamless use on a variety of devices.
