PROFILE

Software developer with experience in FullStack Development. Systems Engineering student with intermediate English Skills. Committed to delivering high quality solutions and constantly improving skills and knowledge.

LABORAL EXPERIENCE

C&A Technology
Web Developer | 2023 – 2023

Designed and developed the company's main webpage, enhancing both the user interface and user experience. Implemented optimization techniques to improve website load time and overall performance. Additionally, I performed regular maintenance and updates to ensure the optimal functioning of the website. The positive feedback received from employers and users reflects the success of delivering a user-friendly and high-performance website.

Freelancer
Freelance Developer| 2023 – ACTUALIDAD

As a freelance full-stack developer, I specialized in creating dynamic and efficient web solutions. I designed and developed robust APIs and endpoints to facilitate seamless communication between front-end and back-end systems. Employing optimization strategies, I significantly improved the overall performance and responsiveness of the applications I worked on. Through regular maintenance and updates, I ensured the continued optimal functioning of the systems. Positive feedback from clients attests to my commitment to delivering user-friendly, high-performance solutions.

EDUCATION

Systems Engineering
Universidad del Magdalena **|** 2021 - Now, Santa Marta, Colombia
